

How to work Control Panel?

This project is about control panel design, The home page is a control panel, it contents 5 buttons (Forward, Backward, Right, Left, and Stop).

All buttons lead to different events, when clicking on the Forward button, it will display the "Forward" word. etc..

On the second page,
There is a button to return to the home page.

In this project I used :
Html, CSS, PHP, phpMyAdmin SQL, JavaScript
